

MUHAMMED SHEREEF K

BCA Graduate | AI & ML | Full-Stack Developer | IoT

shereef888k@gmail.com | 9207101461 | [linkedin.com/in/muhammed-shereef-k-0b3094292](https://www.linkedin.com/in/muhammed-shereef-k-0b3094292) | shereef888k.github.io

PROFESSIONAL SUMMARY

BCA graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, AI systems, REST APIs, and IoT projects. Seeking entry-level roles as a **Software Developer**, Python Developer, AI/ML Engineer, or IoT Developer.

SKILLS

Programming: Python, Java, C, JavaScript

Web: HTML, CSS, Node.js, Flask

Databases: MySQL, SQL

AI/ML: Machine Learning, Data Analysis

Cloud: Microsoft Azure

Tools: Git, Linux, REST APIs

Hardware: Arduino, Raspberry Pi, NodeMCU

PROFESSIONAL EXPERIENCE

AI Intern, QTest Software Solution LLP

Mar 2026 - May 2026

- **Developed AI-based applications** using Python for data-driven solutions
- Built and contributed to **RAG-based systems** for intelligent data processing
- **Integrated REST APIs** and implemented backend logic using Python
- Performed data preprocessing and **improved model performance**
- Collaborated in debugging and optimizing application performance

PROJECTS

Medical Report Analyzer – AI-Based System · Python, Machine Learning, HTML, CSS, JavaScript

<https://medical-report-analyzer-beta.vercel.app/>

- Built AI-based system using Python & ML to analyze medical reports
- Developed backend processing and data extraction logic
- Designed UI for uploading and processing reports

Hospital AI System · Python, JavaScript, Databases

<https://hospital-ai-system-five.vercel.app/>

- Developed system to manage hospital data and workflows
- Implemented backend logic for handling patient data
- Improved efficiency through structured data management

AI Admin Dashboard · HTML, CSS, JavaScript, REST APIs

<https://ai-admin-dashboard.vercel.app/dashboard>

- Built dashboard using web technologies for analytics monitoring
- Integrated REST APIs for real-time data visualization
- Designed user-friendly interface for system insights

Blood Support System · HTML, CSS, JavaScript

https://nationalclub-bloodsupport.netlify.app/

- Developed web platform for blood donor and request management
- Improved emergency response coordination

Human Following Robot (IoT Project) · IoT, Arduino, Raspberry Pi, NodeMCU, Sensors

- Built IoT-based robot using sensors and microcontrollers
- Implemented real-time tracking and motion control

EDUCATION

Bachelor of Computer Applications (BCA), Artificial Intelligence, Machine Learning, Robotics & IoT, Yenepoya (Deemed to be University)

Jun 2023 - May 2026 · Mangalore

CERTIFICATIONS

Power Platform Fundamentals (PL-900) , Microsoft	Mar 2026
AI Fundamentals (AI-900) , Azure	Mar 2026
Azure Data Fundamentals (DP-900) , Azure	Mar 2026
Data Science & Machine Learning using Python and Azure , Yenepoya University & FutureSkills Prime	Feb 2026
Python for Data Science and AI , IBM (Coursera)	Oct 2024
Introduction to Artificial Intelligence , IBM (Coursera)	Dec 2025
Networking Fundamentals , Akamai (Coursera)	Jul 2024
Object-Oriented Programming with Java , LearnQuest (Coursera)	Jul 2023
Linux & Shell Scripting , IBM (Coursera)	Jul 2023
Digital Marketing & E-commerce , Google	Jun 2023
